BY CRANSTON & NORMAN, 127 THAMES STREET.

FRIDAY MORNING, SEPT. 6, 1859.

Newport has been filled to overflow ing this year, with those renominas things slanderers, whose stings are always excussively annoying to the feelings, and not unfrequently blasting to the character. There is always any quantity of this kind of inischief carried on at a fashionable watering place, where the hotels are crowded with all classes of people, who have congregated for a variety of purposes,-some to enjoy themselves, some to make f. ols of themselves, some to steal, and some to commit a sin which cannot be named.

We know of an instance where a base slander was put in circulation at the Ocean House this year by some foul-mouthed and base-hearted ladies, in regard to a gentleman and his wife, which we cannot pass over in silence. The parties are highly respectable, and nover dreamed of coming here to he insulted. The story was probably started, as all events, it was freely circulated by a Mrs. R., who rather uncerimoniously left the place when she found that the gentleman who had been alandored, had heard of the reports in circulation. The story had been current about the house for several days before either of the parties more unmediately interested heard anything of it.

Such misorable things in human shape ought to be reached, and they ought to be punished as long as their flesh could feel a pang. Yet, circulating the meanest, most nasty, contemptible and vulgar reports, is the constant and favorite amusement of many who assemble here during the summer They seem to have no other employment, and so the devil keeps them busy in this way. Such fitthy work is a luxury to thom, and they engage in it with as much zoal and devotion as if they were really serving the Lord.

We have another telass here who are nearly as despicable,—a number of ladies, as they call themselves, who are exceedingly ambitious of chaperoning young ladius into fashionable life, during the season. if their services are accepted, they are no devoted as a chucklin hen to her chickens, and fondle around their protoges with astonishing affection. They are ever ready to sing their praises, and pronounce them; the most beautiful, the most accomplished. the most generful and dearest creatures on earth. Unless cortain youthful ladies, married as well as single, submit themselves body and soul, to these mothers in Sin, There ere year, sugly mented by quitabless and treat them as they deserve, with entire indifference, and never allow themselves to bu placed in their clotches.

WORKMEN SHOULD STUDY,-I respectfully counsel these whom I address [the workingmen of America] I counsel you to labor for a clear understanding of the subjects which a itate the community-to make them your study instead of westing your lessure in vague, passionate talk about them. The time thrown away by the mass of the people on the rumors of the day, might, if better spent, give them a good acquaintance with the constitution, laws, history, and interests of the country, and thus establish them on those great principles by which particular measures are to be determined. In proportion as the people thus improve themselves, they will cause to be the tuols of designing politician . Their intelligence, not their passions, and jealousies, will be addressed by those who seek their votes. They will exercise not a nominal but a real influence in the government and destinies of the country and at the same time will forward their own growth and virtue.-Dr. Channing.

The following laughable anec dote of the funeral of a British Alderman, is told by Southey:

"As soon as he knew his case was desperate, he (called together all the persons to whom he was indebted in his mercentile concerns: 'Gentlemen, I am going to die, and my death wil be an inconveniance to you, because it will be some time before you can get your accounts settled with my executors; now if you will allow me a handsome discount I'll settle them at once They came into the proposal, and the old Alderman turned his death into nine hundred pounds profit.

Rumor charges the Orthordox Cler gyman at Wayland, Mass., with gross misbehavior, in which four ladies of respectable families are involved.

Four generations in Jail.-There is said to be in one of the county jails in Connecticut, a little girl, her mother, grandmother, and great-grandinother. Here iniquity is visited upon the children unto the third and fourth generation.

ARRIVAL OF THE HIBERNIA. The stoamer Hibernia arrived at Halifax on Wednesday.

FRANCE.

Paris, Thursday . The National Guard of Vallone have been disarmed in consequence of some serious attempts at insubardination. When the arms were taken, it was found their bayonets were newly sharpened. Motters for some time wore very serious aspect in this department.

The prefect of the Hanse Marine has caused several domiciliary visits to be made at Varrennes and Dafoiso. The result has been the discovery of a great number of Socialists phamplets, firearms, and a quantity of gunpowder, with directions for making it on a new principle, at a small ex-

Monnay. The President of the Republie, in one of his speeches at Lyons, vaguely hinted to the people that his desire was to prolong in some way his term of power. That being the representative of six millions of electors, that he has no occasion to resert to a coupe d'etat, that patriotism alike enjoins denial and persorverance on his port, and that he will strenuously oppose any rival pretender to the throne of

The permanent committee have held two sittings, but their proceedings have not been marked by any movement of interest except in regard to the speech of the President, which has been brought under their notice by the Mountain party who have designated it as being tureonstitutional."

The Prince de Joinville, is said to be gaining in popularity. The announcement that he would be a candidate for the Presidency at the election in 52, has caused considerable sousation in France. It is stated on the authority of letters from Do Cascon or Bescon, that the President's progress has been seriously intorrupted at that place. It appears that just after his arrival at that town he was attending a ball; crowds flowing to the place, and the attitude of populace became so sinister that the troops had to be called out. As he entered the building, in which the ball was held, he was deafaned with shouts of " Vive le Republique."

Eventually, the ball-room itself was invaded, and the dancers, the President, and his staff among them, were turned out .--Meanwhile Gen. Castilane, who had already drawn his sword for the protection of the President in the ball-room, rallied the troops, and returned at the head of a strong detachment of cavalry, charged award in hand. Presently the half-room was cleared by infantry at the point of the bayonet. These measures sufficed to quell the riot and restore order.

THURBDAY. Another and later account state that the Swiss and French Socialsocialists character of the places he has lately passed through, he has been more favorably received than might have been expected.

flavae, Thursday. Yesterday and for same days pervious, the cotton market was extremely dull. The Liverpool advices of to-day have imparted now life to the trade, and the sales up to 2 o'clock are about 1500 bales, at an advance of 50 centimes to 1 f. Paris Bourso, Thursday, very dull,

DENMARK AND THE DUTCHES.

Our latest accounts from the seat of war extended to the 50th. Listters received from Rensburg to the 19th have been received which state that on the 18th a skirmish took place midway between Schleswig and Rousburg, by the 10th Holetine battailium, having its position in the ontpost of the Holstine army, and advancing Northwards against the Danish out-posts, which were eventually dislodged from the position at Krowt.

AUSTRIA AND HUNGARY.

It is said that the people of Hungary are becoming more reconciled to the nuw govcraincut, but the nobles of both Hungary and Austria were very much discontented. The Caronation of the Emperor presents great difficulties.

The question to be decided upon, is whether, as was formerly the custom, he shall be crowned in each seperate province, or whether he shall be crowned once for all at Vienna, as Emporor of Austria. The Cabinet are for the latter, whilst the Provincon fiercely maintain their rights. It is thought, however, that he will not be crowned this year.

The German and Danish dispute siill occupics considerable attention.

RUSSIA AND TURKEY. The choleta continues bad in Turkey. There is nothing new from the insurrection

The Emperor of Russia has lately added to his splendid collection of works of art, the celebrated Barbagigo gallery of Ven-

azy provinces.

A person representing himself as a Baptist clergyman, presented his credentials lately which were probably forged, to the citizens of Hardwick, Vi., and after spending a few weeks at the houses of several of the inhabitants, married a respectable young lady of that village, in a few days decamped, and has not since been heard of,

14 days later from California.

NEW YORK, Sept. 5, 1 P. M. The Empire City, from Chagres, reached

her whatf at 10 o'clock. She brings no mails.

The Panania had arrived at Panania with two weeks later news. She took the cholera on board at Acapulco, and Oven Formy от пра Развения В В В 1

The California dates are to August 1. The Empire City has on freight \$750,-000, and about \$400,000 in hands of passengers, among whom is Gen. Riley, Ex-Governor of California. The Georgia has one and a half million of gold.

San Francisco, August 1. The Panama sails this evening, with 350 passengers. There was also a large number of applicants for berths, which could not be supplied.

The amount of gold dust sent by this steamer is large—nearly two millions of dollars, on freight and in hands of passengers. Adams & Co. furward \$311,000.

The prospect of a large business this fall is encouraging. Workmen are engaged in grading and planking the streets. In view of the rainy season artesan wells and reservoirs have been made, and fire companies formed to aid in proventing the spread of conflagration, and, in fact, every thing looks cheering.

CONGRESS,

Washington, Sept. 4.

SENATE.-On motion of Mr. Clay the further consideration of the bill to abolish slavery in the District of Columbia was postponed until Tuesday next.

Mr. Dickinson reported back to the Senate the postoffice appropriation bill with amendments, which he explained at some length and which caused considerable debate.

House,-The House met at 12 M., and after the usual opening business, considerable debate took place, in volving the whole subject of obligations of public printers.

The resolution to print five thousand copies of the pension roll was laid upon

Mr. Richardson submitted the majority report of the Ewing committee, which he moved he printed, and the consideration be postponed until next

ment, and said that there was a minority report. Mr. Richardson said that he had the

minority report and would send it

He hoped that the same course would be taken upon that also.

Theyeas and mays were then ordered spon the postponement, and are now being called.

The House refused to postpone the consideration of the "Ewing" report. The hour of II arriving the special

order was taken up, being the Texas boundary bill. Mr. McLane temporarily withdrew his motion for the previous question in order to explain, but subsequently re-

lewed the motion. Tellers were ordered and the motion was carried by 99 to 90.

Mr. Cable, of Ohio, then moved to lay it on the table ; decided in the negative by 30 to 169.

(FTHE SONG COMMITTEE,-The gentlemen employed to select a Welcome Song for Jenny Lind are now at work upon the "six hundred" manuscripts, sent in for their adjudication -We are happy to say that they are not, like other juries interdicted from eating and drinking, until they agree upon a verdict, as in that case death by starvation would stare them in the face.---It is announced that perhaps they, may wade through the sea of rhyme by Saturday evening, if they harry over the "flats and shallows".

MARSHS PATENTO OLL.

THIS is a new investion, recently introduced, and now very extensively need by the public.

Mr. Marsh is constantly receiving, Both at home and from abroad,] the very highest testimation of the true nearists and great superiority of his new Oil, over everything before used for light.—Among them we select the following:

MARSH'S PATEAT OIL—This is the name given to a newly invented Oil, for producing light, which has just here intunded to the public by Mr. Marsh. Having tried it ourselves, we can speak from especiesce, and do not heilarth to award it a high trafer of merit. It is enfuely fire from grease or small while harming, and is not limited to the too common objection of abroat all harming limits, that of explorient. It gives a learning and stready light, is much handsomer than oil, and casts less. Town a slight expense, contain a passion, as the oil harm in firm.

We recommend a trial to those who would chain a beautiful light.—(Instend Journal)
